

SE Lab 1 use case flow

Name : Kushal Jayavarapu

SRN : PES1UG24CS246

Digital Art Commission & Watermarking Portal

Use Case Flow Specification

Use Case: Download Final Asset

Primary Actor: Client Buyer

1.Preconditions

Client Buyer is logged into the portal.

Total payment status for the commission is Fully Paid (100% of milestones released).

The Digital Artist has commissioned the commission as Delivered.

2.Postconditions

Signed time-limited URL for downloading of the final high resolution asset is produced.

Download action is logged in the audit log.

3.Main Success Scenario

Client Buyer navigates to the commission detail page.

System validates that payment status is Fully Paid.

System validates that delivery status is Delivered.

System produces signed S3 URL which is valid for 60 minutes.

System shows button "Download Final Asset" with signed URL.

Client Buyer clicks on the button and downloads high resolution file.

System logs the download action (buyer ID, timestamp, commission ID).

The use case ends successfully.

4.Alternate Flow - Payment Not Fully Completed

System recognizes that payment status is not Fully Paid.

System doesn't produce any download URL.

System shows Client Buyer a notification about unpaid balance and links to complete the payment.
